

MATHEMATICS PATHWAYS AT G D H S

The pathways chart shown represents course choices for each student who is successful in earning his/her credit.

Students should strongly consider their Learning Skills when choosing the appropriate math course.

Students who do not regularly complete practice work, ask questions when unsure nor seek extra help when facing difficulties should be cautious when choosing University level courses, regardless of their level of achievement in the previous math course.

These courses demand strong learning skills in Independent Work, Self-Regulation, and Initiative.
